

# Hambleside Danelaw Building Products

## Important environmental issues

### Greenhouse gases

Hambleside Danelaw has reduced its carbon footprint by **25%** last year and its aim is to do the same again this year!

**By using our products you could reduce your carbon footprint as well!**

### Electricity consumption

Hambleside Danelaw's electricity use has been cut - and all of the electricity for its production plant at Inverness is generated from renewable sources - the aim now is to extend this to all our UK manufacturing operations during 2007.

**Our award winning products can cut your energy costs too!**

### Recycling

Hambleside Danelaw re-uses and recycles **75%** of its manufacturing waste.

**When using our products you can be assured that 99% of the packaging is re-used or recycled and you can continue to re-use or recycle all of it.**

### Waste management

During 2006 Hambleside Danelaw reduced its waste output by **75%**. By the end of 2007 the target is to reduce waste landfill to less than **2 tonnes** per year.

**With all our GRP products you have the guarantee that we will take them back and recycle them at the end of their service life, thereby reducing your waste-to-landfill costs.**

**Hambleside Danelaw**  
Building Products
