WHAT IS DRYSEAL?

Pre-cured

Not a "wet lay" system, Dryseal is fully pre-manufactured and supplied ready to install and finish to a high standard.

Quality

Manufactured to comply with ISO 9001 standards, the Agrément certified GRP membrane can be supplied with purpose-designed trims and fixings to help complete a high-quality installation.

Speed

The pre-manufactured membrane helps to ensure a high standard of jointing and finishing with the minimum of delay and waste.

Versatile

Dryseal can be fitted over most types of roof deck and is suitable for refurbishment, new builds or overlay projects.

Dependable

Quicker than wet-applied systems and more robust than most "single ply" membranes Dryseal is tough and resilient.

Durable and Guaranteed

20 years of guaranteed weathertightness combined with an insured warranty and an expected life exceeding 30 years complete the Dryseal package.

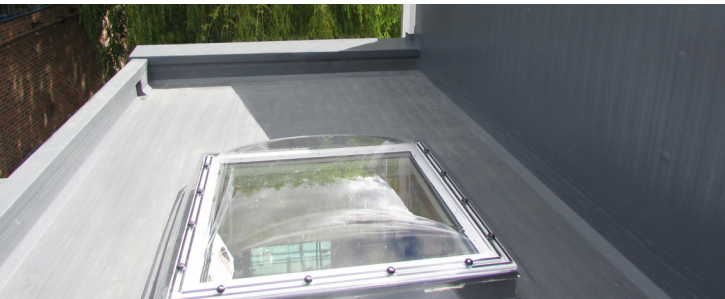

FOR YOU

- ◆ An established track record of completed installations over 25 years
- ◆ Lightweight and easy to handle
- ◆ Ease of jointing
- ◆ Competitive pricing
- ◆ First class training facilities
- ◆ No naked flame needed
- ◆ Can be finished to look like lead
- ◆ Green roof options
- ◆ Suitable for flat, low pitch, vertical and inverted installation
- ◆ Easy to detail to achieve first class results
- ◆ Supplier exclusivity

- ◆ Printed and online case studies
- ◆ Press and PR assistance
- ◆ Leads and specifications

Site and Technical Support

- ◆ Site assistance
- ◆ Refresher training
- ◆ Printed Technical Manual
- ◆ "Top Tips" booklet

The reasons we prefer Dryseal over rubber or felt are the ease of installation, fire safety, robustness, competitive cost and 20-year guarantee. Our men don't want to use any other system by choice, as Dryseal is so little hassle, we don't get call-back to jobs and the customers love it.

This is why 99.5% of our flat roofing work is completed using Dryseal.

- Lee Beaven, Commercial Director, Marden Roofing Ltd
