CPD Seminar: Industrial Rooflight Specification. More Than a Hole in the Roof!

This CPD identifies the key elements that are important in the process of correctly specifying GRP rooflights and the vital role they play in an energy efficient building. The presentation also identifies a new simplified approach to specification writing to help building designers in their energy modelling exercise.

Presented under the follow headings:

- Natural Daylight - Positive benefits realised
- Part L - Considerations, limitations, compliance
- Light Transmission - Daylight factors and appearance
- Solar Transmission - g-value, correlation to light transmission
- Thermal Transmission - Insulation options
- Service Life - Guarantee periods
- System Solutions - Simplified specification approach
